EN.650.631 Ethical Hacking Home Work #4

Recent examples such as [1] remind us that knowledge of core computer science courses is not a requirement to become an expert hacker. The only real requirements are a tenacious spirit and an analytical mind. Given these facts, please use your available resources to perform the below tasks.

1. Place both files into the same folder and figure out how to read one file through the other. This must be done in Linux

In a 2-minute (or less) video, explain and illustrate the results from your work above. You can work in groups of no more than 2. Please email to Lanier.Watkins@jhuapl.edu and put **EN.650.631 and** all student names and in subject.
